ZIMS "Yarb" and Herbs

The early settlers had to rely on the "yarb" and herb medicines compounded by the Indian medicine men.

Taking medicine in those days was usually a kill-or-cure process.

Today it is different. Tested remedies cure nearly all ills.

The precision with which pharmaceuticals are dispensed by our expert prescriptionists explains the rapid growth of our prescription department.

Over a Hundred Years of the Methodist Episcopal Church

In 1806, Rev. John Travis, a young Methodist minister, was sent out to the "Western Conference," which then embraced the Mississippi Valley, from Green County, Tennessee. During that year Mr. Travis organized a number of small churches. At the close of his conference year, he reported the result of his labors to the Western Conference, which was held at Chillicothe, Ohio, in 1870 and showed an aggregate of one hundred and six members and two circuits, one called Missouri and the other Meramec. In 1808, two circuits had been formed, and at each succeeding year the number of circuits and members constantly increased, until 1812, when what was called the Western Conference was divided into the Ohio and Tennessee Conferences, Missouri falling into the Tennessee Conference. In 1810, there were four traveling preachers and in 1820, fifteen traveling preachers, with over 2,000 members. In 1840 there was 72 traveling preachers, 177 local ministers and 13,992 church members. In 1850, the membership of the M. E. Church was over 25,000, and during the succeeding ten years the church prospered rapidly. Today the church membership in Missouri is approximately 140,000.

The Methodist Church in Audrain County and in Mexico has had a surprising growth within the past ten years. The Church Home in Mexico is a handsome structure costing \$30,000 with a membership of approximately 800. The Rev. W. C. Cowart is the minister in charge.

Rev. W. P. Winn, Presiding Elder of the district, comprising 44 churches and 19 preachers in charge.
